### Data in many forms. . .

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer printouts, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

### How to obtain more information

Inquiries about this publication and related statistics or services should be directed to the Statistics Canada reference centre in:

St. John's	772-4073	Winnipeg	949-4020
Halifax	426-5331	Regina	359-5405
Montréal	283-5725	Edmonton	420-3027
Ottawa	992-4734	Vancouver	666-3691
Toronto	966-6586		

**Toll-free access** is provided in all provinces and territories, for users who reside outside the local dialling area of any of the regional reference centres:

Newfoundland & Labrador	Zenith 07037
Nova Scotia, New Brunswick & Prince Edward Island	1-800-565-7192
Québec	1-800-361-2831
Ontario	1-800-268-1150
Manitoba	1-800-282-8006
Saskatchewan	1 (112)-800-667-3524
Alberta	1-800-222-6400
British Columbia (South & Central)	112-800-663-1551
Yukon & Northern B.C. (area served by NorthwTel Inc.)	Zenith 08913
Northwest Territories	Zenith 22015

### How to order publications

This and other Statistics Canada publications may be purchased from local authorized agents and other community bookstores, through the local Statistics Canada offices, or by mail order to Publication Sales and Services, Statistics Canada, Ottawa, Ontario, K1A 0V7.

### Des données sous plusieurs formes. . .

Statistique Canada diffuse des données sous diverses formes. Outre les publications, des totalisations habituelles et spéciales sont offertes sur imprimés d'ordinateur, sur microfiches et microfilms, et sur bandes magnétiques. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordiolinguage et le système d'extraction de Statistique Canada.

### Comment obtenir d'autres renseignements

Toute demande de renseignements au sujet de cette publication ou de statistiques et services connexes doit être adressée aux centres de référence de Statistique Canada à:

St. John's	772-4073	Winnipeg	949-4020
Halifax	426-5331	Regina	359-5405
Montréal	283-5725	Edmonton	420-3027
Ottawa	992-4734	Vancouver	666-3691
Toronto	966-6586		

Un **service d'appel sans frais** est offert, dans toutes les provinces et dans les territoires, aux **utilisateurs qui habitent à l'extérieur des zones de communication locale** des centres de référence régionaux:

Terre-Neuve et Labrador	Zénith 07037
Nouvelle-Écosse, Nouveau-Brunswick et Île-du-Prince-Édouard	1-800-565-7192
Québec	1-800-361-2831
Ontario	1-800-268-1150
Manitoba	1-800-282-8006
Saskatchewan	1 (112)-800-667-3524
Alberta	1-800-222-6400
Colombie-Britannique (région sud et centrale)	112-800-663-1551
Yukon et le nord de la Colombie-Britannique (région desservie par NorthwTel Inc.)	Zénith 08913
Territoires du Nord-Ouest	Zénith 22015

### Comment commander les publications

On peut se procurer cette publication et les autres publications de Statistique Canada auprès des agents autorisés et des autres librairies locales, par l'entremise des bureaux régionaux de Statistique Canada, ou en écrivant à Ventes et distribution de publications, Statistique Canada, Ottawa, (Ontario), K1A 0V7.

## ENUMERATION AREA REFERENCE LIST

### GENERAL INTRODUCTION

This is one of a series of geographic reference lists prepared as an aid to users of data from the 1981 Census of Canada. In each, the linkages between the basic unit of data collection (the enumeration area) and the various standard geographic areas of data presentation (the census geostatistical areas) are shown.

The enumeration area (see definition below) is the basic geographic unit of census data collection, and is also the smallest geographic area for which census data are normally available. All standard census geostatistical areas are composed of one or more complete enumeration areas as identified in these reference lists.

Linkages also exist between and among census geostatistical areas. For example, a census division is composed of complete census subdivisions and a census metropolitan area is composed of many complete census tracts, and so on. These linkages are indicated in the relevant reference list.

The Standard Geographical Classification codes required to access the various census geostatistical areas are included in each reference list and are accompanied by instructions as to their use.

The geographic information contained in these lists may be used to access census data tabulated by standard census geostatistical areas or may be used to formulate user-defined areas for which census data are required.

Census data can be tabulated for user-defined areas not respecting enumeration area boundaries by using the Geographically Referenced Data Storage and Retrieval System (GRDSR), also known as Geocoding. Data for user-defined areas in the larger urban areas can be tabulated at the block-face level, whereas outside the block-face geocoded urban areas data for user-defined areas are tabulated by aggregating data for complete enumeration areas. Users wishing further information regarding the Geocoding system and special requests should contact the nearest Statistics Canada Regional Reference Centre.

## LISTE DE RÉFÉRENCE DES SECTEURS DE DÉNOMBREMENT

### INTRODUCTION GÉNÉRALE

La présente fait partie d'une série de listes de référence géographiques dressées pour venir en aide aux utilisateurs des données du recensement du Canada de 1981. Chacune de ces listes indique les liens qui existent entre l'unité de base de la collecte des données, soit le secteur de dénombrement, et les différentes régions géographiques normalisées utilisées pour la présentation des données (unités géostatistiques de recensement).

Le secteur de dénombrement (voir définition ci-dessous) constitue l'unité géographique de base qui sert à la collecte des données du recensement. Il constitue également la plus petite région géographique pour laquelle des données du recensement sont habituellement disponibles. Toutes les unités géostatistiques normalisées sont composées d'un ou de plusieurs secteurs de dénombrement entiers, tel qu'il est indiqué sur les listes de référence.

Il existe également des liens entre d'autres unités géostatistiques de recensement. Par exemple, une division de recensement comprend plusieurs subdivisions de recensement entières, une région métropolitaine de recensement regroupe plusieurs secteurs de recensement entiers, et ainsi de suite. Ces liens figurent sur la liste de référence correspondante.

Chaque liste de référence énumère les codes de la Classification géographique type à utiliser pour obtenir des données portant sur les diverses unités géostatistiques de recensement de même que des instructions connexes.

A partir des renseignements géographiques contenus dans ces listes, il est possible d'obtenir des données du recensement totalisées par unité géostatistique normalisée et de délimiter des régions pour lesquelles les utilisateurs demandent des renseignements.

Les données du recensement peuvent être totalisées pour des régions définies par les utilisateurs et ne correspondant pas aux limites des secteurs de dénombrement, grâce au Système de stockage et d'extraction des données codées suivant une grille géographique (GRDSR) appelé aussi Géocodage. Lorsque l'utilisateur demande des données portant sur les grandes régions urbaines, celles-ci sont totalisées par secteur formé de côtés d'îlot; pour toute autre région, la totalisation est faite par l'agrégation des données se rapportant à des secteurs de dénombrement entiers. Pour de plus amples renseignements sur le système de Géocodage ou pour toute demande spéciale, les utilisateurs peuvent communiquer avec le personnel du centre de référence régional de Statistique Canada de leur région.

Reference maps showing the boundaries of all census geostatistical areas are available to census users in the form of published reference maps and large scale reference maps available on demand. A guide to reference maps available for the 1981 Census is included in the announcement of Products and Services of the 1981 Census of Canada. Further information and/or maps may be obtained by contacting the nearest Statistics Canada Regional Reference Centre.

Statistique Canada publie des cartes de référence sur lesquelles figurent les limites de toutes les unités géostatistiques du recensement. Il offre également des cartes à grande échelle aux utilisateurs qui en font la demande. Le document Produits et services du recensement du Canada de 1981 inclut la liste des cartes de référence disponibles dans le cadre du recensement de 1981. Pour obtenir de plus amples renseignements ou des cartes, les utilisateurs peuvent s'adresser au centre de référence régional de Statistique Canada de leur région.

## ENUMERATION AREA REFERENCE LIST

### CENSUS SUBDIVISIONS

#### PRESENTATION

This Reference List is divided into four parts, as follows:

- (1) Atlantic Provinces
- (2) Quebec
- (3) Ontario
- (4) Western Provinces and the Territories

Census subdivisions are presented in hierarchical fashion, as follows:

- (1) by province in geographical order from east to west and, within each province;
- (2) by census division in alphabetical order and, within each census division;
- (3) by census consolidated subdivision in code order and, within each census consolidated subdivision;
- (4) by census subdivision in alphabetical order.

Indian Reserves, Indian Settlements and Unorganized Territories are all treated as separate census subdivisions.

This Reference List also presents the urban area(s) which is (are) completely or partially within each census subdivision. The boundaries of urban areas correspond to those of enumeration areas but not necessarily to those of provinces, census divisions and census subdivisions. Those census subdivisions that are totally or partly rural are so indicated. Urban and rural are presented in hierarchical fashion within each census subdivision, as follows:

- (1) urban areas, or parts thereof, in numerical order;
- (2) rural areas.

The enumeration areas making up the urban and rural parts of each census subdivision are presented in hierarchical fashion, as follows:

- (1) by federal electoral district in numerical order and, within each federal electoral district;
- (2) by enumeration area in numerical order.

## LISTE DE RÉFÉRENCE DES SECTEURS DE DÉNOMBREMENT

### SUBDIVISIONS DE RECENSEMENT

#### PRÉSENTATION

La présente liste de référence est divisée en quatre parties, comme suit:

- (1) Provinces de l'Atlantique
- (2) Québec
- (3) Ontario
- (4) Provinces de l'Ouest et les Territoires

Les subdivisions de recensement sont présentées selon la structure hiérarchique suivante:

- (1) par ordre géographique de province d'est en ouest et, à l'intérieur de chaque province;
- (2) par ordre alphabétique de division de recensement et, à l'intérieur de chaque division de recensement;
- (3) par ordre numérique de subdivision de recensement unifiée et, à l'intérieur de chaque subdivision de recensement unifiée;
- (4) par ordre alphabétique de subdivision de recensement.

Les réserves et les établissements indiens de même que les territoires non organisés sont considérés comme des subdivisions de recensement distinctes.

Cette liste de référence donne également la ou les régions urbaines qui se trouvent en totalité ou en partie dans chacune des subdivisions de recensement. Les limites des régions urbaines correspondent à celles des secteurs de dénombrement mais pas forcément à celles des provinces, des divisions de recensement ou des subdivisions de recensement. La liste indique en outre les subdivisions de recensement qui sont en partie rurales et celles qui le sont en totalité. Les régions urbaines et rurales à l'intérieur de chacune des subdivisions de recensement sont présentées selon la structure hiérarchique suivante:

- (1) par ordre numérique de région urbaine ou de partie de région urbaine; et
- (2) par région rurale.

Les secteurs de dénombrement qui constituent les parties urbaines ou rurales de chaque subdivision de recensement paraissent en ordre hiérarchique, comme suit:

- (1) par ordre numérique de circonscription électorale fédérale et, à l'intérieur de chaque circonscription électorale fédérale;
- (2) par ordre numérique de secteur de dénombrement.

**TABLE LAYOUT**

The table is laid out as follows:

- A. At the head of the table:
- (1) Province/Territory code
  - (2) Province/Territory name
- B. Within the body of the table, from left to right:
- (1) Census Division (CD) code
  - (2) Census Consolidated Subdivision (CCS) code
  - (3) Census Subdivision (CSD) code
  - (4) Census Division and Census Subdivision names
  - (5) Census Subdivision type
  - (6) Urban Area code or Rural designation
  - (7) Urban Area name
  - (8) Federal Electoral District (FED) code
  - (9) Enumeration Area (EA) codes

**CODING REQUIREMENTS**

Codes for standard census geostatistical areas are the Standard Geographical Classification codes and are the only codes used to access these geostatistical areas. The following are the coding requirements to uniquely identify within Canada these areas:

Province/Territory  
Province/Territory code (2 digits)

Census Division  
Province/Territory code (2 digits) +  
Census Division code (2 digits)

Census Subdivision  
Province/Territory code (2 digits) +  
Census Division code (2 digits) +  
Census Subdivision code (3 digits)

Census Consolidated Subdivision  
Province/Territory code (2 digits) +  
Census Division code (2 digits) +  
Census Consolidated Subdivision code (3 digits)

Urban Area  
Urban Area code (4 digits)

**DISPOSITION DU TABLEAU**

Le tableau est disposé de la façon suivante:

- A. En-tête du tableau:
- (1) code de la province ou du territoire
  - (2) nom de la province ou du territoire
- B. Corps du tableau, de gauche à droite:
- (1) code de la division de recensement (DR)
  - (2) code de la subdivision de recensement unifiée (SRU)
  - (3) code de la subdivision de recensement (SDR)
  - (4) noms de la division et de la subdivision de recensement
  - (5) catégorie de la subdivision de recensement
  - (6) code de la région urbaine ou désignation rurale
  - (7) nom de la région urbaine
  - (8) code de la circonscription électorale fédérale (CÉF)
  - (9) codes des secteurs de dénombrement (SD)

**EXIGENCES RELATIVES AU CODAGE**

Les codes des unités géostatistiques normalisées de recensement correspondent à ceux de la Classification géographique type et sont les seuls codes utilisés pour obtenir des données se rapportant à ces unités. Voici la liste des exigences établies pour attribuer un code unique à ces unités à l'intérieur du Canada:

Province ou territoire  
code de la province ou du territoire (2 chiffres)

Division de recensement  
code de la province ou du territoire (2 chiffres) +  
code de la division de recensement (2 chiffres)

Subdivision de recensement  
code de la province ou du territoire (2 chiffres) +  
code de la division de recensement (2 chiffres) +  
code de la subdivision de recensement (3 chiffres)

Subdivision de recensement unifiée  
code de la province ou du territoire (2 chiffres) +  
code de la division de recensement (2 chiffres) +  
code de la subdivision de recensement unifiée (3 chiffres)

Région urbaine  
code de la région urbaine (4 chiffres)

Federal Electoral District  
Province/Territory code (2 digits) +  
Federal Electoral District code (3 digits)

Enumeration Area  
Province/Territory code (2 digits) +  
Federal Electoral District code (3 digits) +  
Enumeration Area code (3 digits)

Circonscription électorale fédérale  
code de la province ou du territoire (2 chiffres) +  
code de la circonscription électorale fédérale  
(3 chiffres)

Secteur de dénombrement  
code de la province ou du territoire (2 chiffres) +  
code de la circonscription électorale fédérale  
(3 chiffres) +  
code du secteur de dénombrement (3 chiffres)

## INDEXES

Following the table, three indexes are provided to aid users in accessing census subdivisions and urban areas in the table.

The first index lists all CSDs, by province, in alphabetical order indicating the census division in which each is located. The index is laid out as follows:

- A. At the head of the index:
  - (1) Province/Territory code
  - (2) Province/Territory name
- B. Within the body of the index, from left to right:
  - (1) Census Subdivision name
  - (2) Census Subdivision type
  - (3) Census Division name

The second index lists all urban areas, by province, in alphabetical order indicating the census division in which each is located. This index is laid out as follows:

- A. At the head of the index:
  - (1) Province/Territory code
  - (2) Province/Territory name
- B. Within the body of the index, from left to right:
  - (1) Urban Area name
  - (2) Census Division name

NOTE: Urban areas do not respect census division boundaries, therefore, more than one census division may be indicated for an urban area.

## INDEX

A la suite du tableau figurent trois index pour permettre aux utilisateurs de retrouver les subdivisions de recensement et les régions urbaines contenues dans le tableau.

Le premier index dresse la liste alphabétique de toutes les SDR par province et indique la division de recensement dans laquelle elles se trouvent. L'index se présente comme suit:

- A. En-tête de l'index:
  - (1) code de la province ou du territoire
  - (2) nom de la province ou du territoire
- B. Corps de l'index, de gauche à droite:
  - (1) nom de la subdivision de recensement
  - (2) catégorie de la subdivision de recensement
  - (3) nom de la division de recensement

Le deuxième index dresse la liste alphabétique de toutes les régions urbaines par province et indique la division de recensement dans laquelle elles se trouvent. L'index se présente comme suit:

- A. En-tête de l'index:
  - (1) code de la province ou du territoire
  - (2) nom de la province ou du territoire
- B. Corps de l'index, de gauche à droite:
  - (1) nom de la région urbaine
  - (2) nom de la division de recensement

NOTA: Les limites des régions urbaines ne respectent pas forcément celles des divisions de recensement. Par conséquent, il se peut que pour une même région urbaine, plus d'une division de recensement soit indiquée.

A third index permits users knowing only the census division codes to access the census division names by which the table is organized. This index is laid out as follows:

A. At the head of the index:

- (1) Province/Territory code
- (2) Province/Territory name

B. Within the body of the index, from left to right:

- (1) Census Division code
- (2) Census Division name

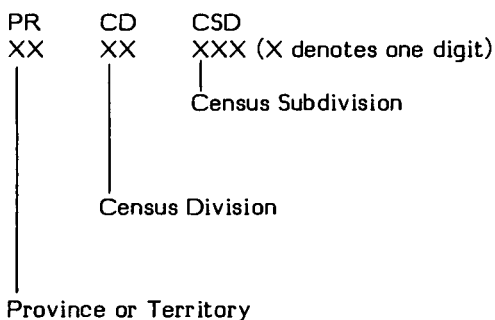

## DEFINITIONS

**Geostatistical Area.** Refers to geographic areas delineated or employed for the tabulation and dissemination of census data. This term applies to provinces and territories, census divisions, census subdivisions, census consolidated subdivisions, census metropolitan areas, census agglomerations, census tracts, provincial census tracts and urban areas.

**Standard Geographical Classification (SGC).** The Standard Geographical Classification provides systematic identification for three types of geographic areas. These are:

- (1) provinces and territories;
- (2) census divisions (counties, regional municipalities, and regional districts, for example); and
- (3) census subdivisions (usually municipalities).

The three area systems are hierarchically related. Census subdivisions (CSDs) aggregate to census divisions (CDs), which in turn aggregate to a province or a territory (PR). This relationship is reflected in the seven-digit SGC code:

L'utilisateur peut se reporter au troisième index lorsqu'il ne dispose que des codes des divisions de recensement et qu'il désire obtenir les noms des divisions pour consulter le tableau. Cet index se présente comme suit:

A. En-tête de l'index:

- (1) code de la province ou du territoire
- (2) nom de la province ou du territoire

B. Corps de l'index, de gauche à droite:

- (1) code de la division de recensement
- (2) nom de la division de recensement

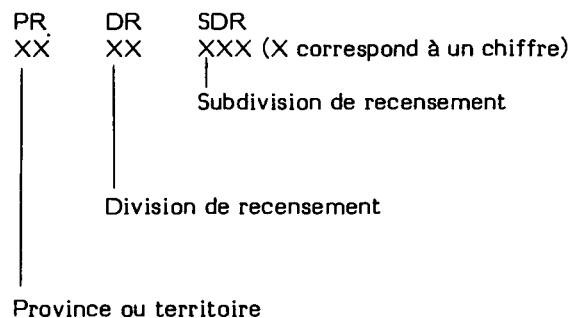

## DÉFINITIONS

**Unité géostatistique.** Toute région géographique délimitée ou utilisée pour la totalisation et la diffusion des données du recensement. L'expression englobe les provinces et territoires, les divisions de recensement, les subdivisions de recensement, les subdivisions de recensement unifiées, les régions métropolitaines de recensement, les agglomérations de recensement, les secteurs de recensement, les secteurs de recensement provinciaux et les régions urbaines.

**Classification géographique type (CGT).** La Classification géographique type est un système d'identification de trois types de régions géographiques:

- (1) provinces et territoires;
- (2) divisions de recensement (par ex., comtés, municipalités régionales et districts régionaux);
- (3) subdivisions de recensement (habituellement des municipalités).

Ces trois types de territoire constituent la structure hiérarchique de ce système. En effet, les subdivisions de recensement (SDR) peuvent être groupées pour former des divisions de recensement (DR) qui sont, à leur tour, regroupées en une province ou un territoire (PR). Le code à sept chiffres de la CGT reproduit cet ordre hiérarchique:

## DEFINITIONS - Continued

For the 1981 Census, the Standard Geographical Classification is the sole official geographical classification system for dissemination purposes.

**Geographically Referenced Data Storage and Retrieval System (GRDSR-Geocoding).** GRDSR, or geocoding, refers to a system that is used to geographically code and store census data. The geocoding system assigns geographic coordinates (centroids) at the population centre of every enumeration area in Canada and of each block-face in most of the large (50,000 population and over) urban centres.

**Block-face.** Refers to one side of a city street, between consecutive intersections with streets or similar physical features, for which census data are coded and stored on the basis of grid co-ordinates and from which the query areas of users can be constructed in a building-block fashion.

**Province.** Refers to the major political division of Canada. From a statistical point of view, it is a basic unit for which data are tabulated and cross-classified. In census publications, provincial tables include the Yukon and Northwest Territories.

**Census Division (CD).** Refers to the general term applying to counties, regional districts, regional municipalities and five other types of geographic areas made up of groups of census subdivisions. In Newfoundland, Manitoba, Saskatchewan and Alberta, the term describes areas that have been created by Statistics Canada in cooperation with the provinces as an equivalent for counties.

**Census Consolidated Subdivision (CCS).** A census consolidated subdivision is a geographically contiguous group of census subdivisions.

Two rules are applied in delineating census consolidated subdivisions:

- (1) all census subdivisions smaller than 25 square kilometres are grouped with a larger subdivision; and
- (2) if a census subdivision greater than 25 square kilometres is surrounded on more than half its perimeter by another subdivision, it is included as part of the CCS formed by the other subdivision; if not, the census subdivision forms a CCS on its own.

## DÉFINITIONS - suite

En 1981, la Classification géographique type est la seule classification géographique officielle utilisée pour les besoins de diffusion des données.

**Système de stockage et d'extraction des données codées suivant une grille géographique (GRDSR-Géocodage).** Système utilisé pour attribuer des codes géographiques aux données du recensement et ensuite les stocker. Le système de géocodage attribue des coordonnées géographiques (centroïdes) au centre de gravité de la population de chaque secteur de dénombrement au Canada et de chaque côté d'îlot dans la plupart des grandes régions urbaines (50,000 habitants et plus).

**Côté d'îlot.** Côté de rue situé entre deux intersections consécutives formées par la rencontre de deux rues, d'une rue et d'un trait physique ou de deux traits physiques. Les données de recensement sont codées et stockées pour chaque côté d'îlot suivant un système de coordonnées. Le côté d'îlot permet de construire les secteurs demandés par l'utilisateur.

**Province.** Principale division politique du Canada. Du point de vue statistique, c'est une unité de base pour laquelle toutes les données sont totalisées et recoupées. Dans les publications du recensement, les tableaux relatifs aux provinces comprennent le Yukon et les Territoires du Nord-Ouest.

**Division de recensement (DR).** Terme générique qui désigne les comtés, les districts régionaux, les municipalités régionales et cinq autres types de régions géographiques formées de groupes de subdivisions de recensement. À Terre-Neuve, au Manitoba, en Saskatchewan et en Alberta, l'expression désigne les unités créées comme équivalents des comtés et délimitées par Statistique Canada en collaboration avec les provinces.

**Subdivision de recensement unifiée (SRU).** Une subdivision de recensement unifiée est une unité géostatistique qui regroupe plusieurs subdivisions de recensement adjacentes.

Pour délimiter les subdivisions de recensement unifiées, il faut appliquer les deux règles suivantes:

- (1) toutes les subdivisions de recensement de moins de 25 kilomètres carrés sont incluses dans une plus grande subdivision de recensement;
- (2) si une subdivision de recensement dont la superficie est supérieure à 25 kilomètres carrés est entourée d'une autre subdivision de recensement sur plus de la moitié de son périmètre, elle fait alors partie de la SRU formée par la subdivision de recensement environnante; sinon, elle constitue à elle seule une SRU.

## DEFINITIONS - Continued

**Census Subdivision (CSD).** Refers to the general term applying to municipalities, Indian Reserves, Indian Settlements and unorganized territories.

In Newfoundland, Nova Scotia and British Columbia, the term also describes geostatistical areas that have been created by Statistics Canada in cooperation with the provinces as an equivalent for municipalities.

The 1981 Census was taken according to the municipal boundaries in effect on January 1, 1981.

It should be noted that the parts of Flin Flon located in Manitoba and Saskatchewan and the parts of Lloydminster located in Saskatchewan and Alberta are treated as separate CSDs.

In 1981, for the first time, each Indian Reserve and unorganized territory is reported separately in those census tabulations reporting data by census subdivision.

Summaries of CSD changes are available in the form of two bulletins:

- (1) Changes to Municipal Boundaries, Status and Names (Catalogue No. 12-201, Annual); and
- (2) Standard Geographical Classification, 1981, Vol. I (Catalogue No. 12-567, Occasional).

**Census Subdivision Type.** Census subdivisions are classified into various types, according to official designations adopted by provincial or federal authorities. With the exception of unorganized territories and Indian Reserves, the type indicates the municipal status of a CSD. The following list indicates the abbreviations used for the most common CSD types:

BOR	Borough
C	City - Cité
CM	County (Municipality)
COM	Community
CT	Canton (Municipalité de)
CU	Cantons unis (Municipalité de)
DM	District (Municipality)
HAM	Hamlet
ID	Improvement District
LGD	Local Government District
LID	Local Improvement District
LOT	Township and Royalty
MC	Municipal Corporation
MD	Municipal District
PAR	Parish
P	Paroisse (Municipalité de)
R	Indian Reserve - Réserve indienne
RM	Rural Municipality
RV	Resort Village
SA	Special Area

## DÉFINITIONS - suite

**Subdivision de recensement (SDR).** Terme générique qui désigne les municipalités, les réserves indiennes, les établissements indiens et les territoires non organisés.

À Terre-Neuve, en Nouvelle-Écosse et en Colombie-Britannique, l'expression désigne également des unités géostatistiques créées comme équivalents des municipalités et délimitées par Statistique Canada en collaboration avec les provinces.

Le recensement de 1981 a été fait en fonction des limites des municipalités au 1<sup>er</sup> janvier 1981.

À noter que les parties de Flin Flon qui se trouvent au Manitoba et en Saskatchewan, et celles de Lloydminster qui se trouvent en Saskatchewan et en Alberta sont considérées comme des subdivisions de recensement distinctes.

Pour la première fois, en 1981, chaque réserve indienne et chaque territoire non organisé figure séparément dans les tableaux de données présentées par subdivision de recensement.

Deux bulletins expliquent sommairement les changements apportés aux SDR:

- (1) Changements de limites, de statut et de nom des municipalités (n° 12-201 au catalogue, publication annuelle)
- (2) Classification géographique type, 1981. Vol. I (n° 12-567 au catalogue, publication hors série).

**Catégorie de subdivision de recensement.** Les subdivisions de recensement sont classées en diverses catégories selon les appellations adoptées par les autorités provinciales ou fédérales. À l'exception des territoires non organisés et des réserves indiennes, la catégorie indique le statut d'une subdivision de recensement. Voici la liste des abréviations des catégories de subdivision de recensement les plus courantes:

DEFINITIONS - Continued

DÉFINITIONS - suite

SCM	Subdivision of County Municipality
SD	Sans désignation (Municipalité)
S-E	Indian Settlement - Établissement indien
SET	Settlement
SRD	Subdivision of Regional District
SUN	Subdivision of Unorganized
SV	Summer Village
T	Town
TP	Township
UNO	Unorganized - Non organisé
V	Ville
VL	Village

For the 1981 Census, all Newfoundland CSDs called Local Government Community (LGC) in 1976 have been changed to Community (COM). In Quebec, all CSDs typed Municipality - Municipalité (MUN) in 1976 have been changed to Cantons unis (CU), Canton (CT), Paroisse (P) or Sans désignation (SD) for 1981. In the Northwest Territories one new CSD type has been added for the 1981 Census; i.e., Settlement (SET).

**Municipality.** Refers to an area with corporate status governed by Provincial and Territorial Acts. These acts differ from province to province. Moreover, municipalities within each province vary in name, status, and administrative powers.

**Indian Reserve.** Refers to territory, mostly rural and varying in size, that belongs to an Indian tribe according to treaties between the Federal Government and the Indians. It is excluded from local jurisdiction and administered by the Federal Department of Indian Affairs and Northern Development.

**Unorganized Territory.** Refers to an area without municipal organization, directly administered by the province or, when applicable, by the county. Such areas are generally characterized by low population density.

**Urban Area.** Refers to an area having a population concentration of 1,000 or more and a population density of 400 or more per square kilometre.

**Rural Area.** Refers to all territory lying outside "Urban Areas".

**Federal Electoral District (FED).** Refers to any territorial unit entitled to return a member to serve in the House of Commons. There are 282 FEDs in Canada based on the 1976 Representation Order. These FEDs are used both to present data and to organize census-taking.

En 1981, toutes les SDR de Terre-Neuve désignées "Local Government Community" (LGC) en 1976 sont devenues des "Community" (COM). Au Québec, toutes les SDR classées comme municipalités (MUN), en 1976, sont devenues des cantons unis (CU), des cantons (CT), des paroisses (P) ou sont sans désignation (SD), en 1981. Les Territoires du Nord-Ouest comportent une nouvelle catégorie de SDR en 1981, le "Settlement" (SET).

**Municipalité.** Territoire constitué en corporation, régi par des lois provinciales et territoriales. Les lois diffèrent d'une province à une autre. De plus, dans chaque province, les municipalités ont des appellations, des statuts et des pouvoirs administratifs différents.

**Réserve indienne.** Territoire, le plus souvent rural et de taille variable, qui appartient à une tribu indienne en vertu de traités conclus entre le gouvernement fédéral et les Indiens. Elle échappe à la compétence des autorités locales et est administrée par le ministère des Affaires indiennes et du Nord.

**Territoire non organisé.** Région sans organisation municipale, administrée directement par la province ou, selon le cas, par le comté. Ces régions sont généralement caractérisées par la faible densité de leur population.

**Région urbaine.** Région dont la concentration démographique est de 1,000 habitants ou plus et dont la densité de population est de 400 habitants ou plus au kilomètre carré.

**Région rurale.** Tout territoire situé en dehors des "régions urbaines".

**Circonscription électorale fédérale (CÉF).** Division territoriale élisant un député à la Chambre des communes. Il y a 282 CÉF au Canada conformément à l'Ordonnance de représentation de 1976. Ces CÉF sont utilisées tant pour présenter les données que pour organiser la tenue du recensement.

**DEFINITIONS - Concluded**

**Enumeration Area (EA).** Refers to the spatial unit usually canvassed by one Census Representative. It is defined according to the following criteria: (1) Population - the number of households in an enumeration area varies between a maximum of 375 households in large urban areas to a minimum of 125 in rural areas; (2) Limits - an enumeration area, being the building block of all geostatistical areas, never cuts across any geographic area recognized by the census. Moreover, enumeration area boundaries are such that the Census Representative will be able to locate them without difficulty as, for example, streets, roads, railways, rivers and lakes. Enumeration areas are normally the smallest geographic unit for which census data are available.

**DÉFINITIONS - fin**

**Secteur de dénombrement (SD).** Unité géographique dénombrée par un recenseur. Elle est définie selon les critères suivants: (1) Population - le nombre de ménages dans un secteur de dénombrement peut varier de 375 (maximum) dans les grandes régions urbaines à 125 (minimum) dans les régions rurales; (2) Limites - un secteur de dénombrement étant l'unité de base de toutes les unités géostatistiques ne déborde jamais une unité reconnue par le recensement. Par ailleurs, les limites des secteurs de dénombrement sont telles que le recenseur peut les repérer sans difficulté, par exemple, rues, chemins, voies ferrées, rivières et lacs. Les secteurs de dénombrement constituent normalement les plus petites unités géographiques pour lesquelles on peut obtenir des données de recensement.
